CONTACTS: Phone: 0778277900 / 0748338796 | Email: inzamarobin279@gmail.com

SUBJECT: CONCEPT NOTE AND FORMAL SUBMISSION ON "CIVICDUTY" GLOBAL DIGITAL NATION MANAGEMENT PLATFORM FOR QUALITY SERVICE DELIVERY MONITORING & PUBLIC CONTRACT SUPERVISION

1. EXECUTIVE SUMMARY

We respectfully write to formally submit this Concept Note introducing CivicDuty, an indigenous digital civic technology platform engineered to elevate Quality Service Delivery across Uganda, combat corruption in public procurement and contract execution, and establish an unbroken feedback loop between citizens, government authorities, and service providers.

2. INSPIRATION & FIELD BACKGROUND

The development of CivicDuty was directly sparked by the public challenge issued by Hon. Alioni Yorke Odria, calling upon innovators to confront corruption in public service delivery, anchored in 3 years of field experience supervising public infrastructure contracts.

3. PUBLIC CONTRACT SUPERVISION

Enforces geotagged milestone proof uploads (Foundation, Walling, Roofing, Finishing) and tripartite digital sign-offs before payments unlock.

4. COMMERCIAL MODEL & FOREIGN REVENUE

Universal free access for citizens. Institutional SaaS licenses generate revenue remitted to Uganda headquarters as tech export revenue.
